

Deepstore and Alliance & Leicester open the doors to a new partnership

DeepStore has been appointed by Alliance & Leicester, a high street bank, to provide all of their off-site records management requirements.

As part of the contract, DeepStore has constructed a purpose-built, dedicated room to accommodate Alliance & Leicester's storage requirements at their largest facility in Winsford, Cheshire. The official room opening took place at the end of October.

According to DeepStore, their site enjoys unparalleled natural security and an environment that lends itself to storing long-term archive material in a 150 metre below-ground facility, which is free from the dangers of UV light, vermin and flooding.

Nigel Hardman of Alliance & Leicester, said: "Records management is critical to Alliance & Leicester and DeepStore demonstrated exceptional understanding of our requirements and clearly indicated their capabilities in offering some of the best services in the country, whilst following all of the required industry standards. We are delighted to have our own room, designed and built to meet to our exact specifications"

Stephen Holmes, Managing Director of DeepStore added: "We are extremely proud to have been awarded this contract and look forward to developing our partnership with Alliance & Leicester over the coming months to meet all of their future active and archive requirements."
