**DEEPSTORE AND ALLIANCE & LEICESTER OPEN THE DOORS TO A NEW AND
SUCCESSFUL PARTNERSHIP**

DeepStore, one of the UK's fastest growing Records Management companies has recently been appointed by Alliance and Leicester, the high street building society, to manage all their records management requirements at DeepStore's largest facility in Winsford, Cheshire.

Stephen Holmes, Managing Director said: "This is a significant win for DeepStore. We are extremely pleased and proud that we can now include Alliance & Leicester as one of our major clients and look forward to developing our partnership to meet all Alliance & Leicester's future requirements."

Nigel Hardman of Alliance and Leicester, added: "Records Management is so important to Alliance and Leicester and DeepStore demonstrated exceptional understanding of the records management industry and clearly indicated their capabilities in offering some of the best services in the country, whilst following all of the required industry standards."

As part of the contract DeepStore has constructed a purpose built dedicated room to accommodate the storage requirements for Alliance and Leicester which had its official room opening on Friday 24th October.

"It is great that we now have our own room, designed and built to meet to our specification – the official opening of the room was very impressive, from the unveiling of the plaque, tour of the mine and the fantastic hospitality. It was a great day, celebrating our achievements to date and we are all very excited about filling the full space available." said Nigel Hardman

The site enjoys unparalleled natural security and an environment that lends itself to storing long term archive material in its 150 metre below-ground facility, which is completely free from the dangers of UV light, vermin and flooding.

- ends -

DeepStore provides document management and storage facilities to private and public companies with unlimited potential for long-term archive expansion with over 20 million cubic metres of void space currently available.

DeepStore works with many UK wide organisations, including The National Archives, The Bodleian Library, police forces, hospitals, local authorities and numerous large and small private businesses.
